512463	Sara Edward	F	15/9/2001
512463	Nora Ghaly	F	22/6/1976

Queries:

1. Display the employee **First name**, **last name**, **Salary** and **Department number** in **department 30** whose **salary from 1000 to 2000 LE monthly**

```
SELECT Fname, Lname, Salary,Dno
FROM employee
WHERE Dno =30 and salary between 1000 and 2000 ;
```

2. Display all the **projects names**, **locations** and the **department number which is managed by it**.

```
SELECT Pname, Plocation ,Dnum
FROM project
order by Dnum;
```

3. If you know that the company policy is to pay an annual commission for each employee which specific percent equals 10% of his/her annual salary .

Display each **employee full name** and his **annual commission** in an **ANNUAL COMM** column (alias).

```
SELECT Fname+ Lname as [employee full name] ,Salary*12*.10
as[annual commission ]
FROM employee
```

4. Display the **employees Id**, **fname** who earns more than 1000 LE.

```
SELECT SSN as [employees Id] ,fname
FROM employee
where salary >1000
```

5. Display the **names** and **salaries** of **the female employees**

```
SELECT Fname+Lname as [names] ,Salary as[salaries ]
FROM employee
where gender ='f'
```

--

6. Display each **department id, name** which **managed by a manager with id equals 968574.**

```
SELECT Dnum as [department id] ,Dname as[name ]  
FROM departments  
where MGRSSN =968574
```

7. Display the **project id, name and location** of the projects which **controlled with department 10 or 20, and location of the projects in Cairo or Alex city**

```
SELECT Pnumber as [project id] , Pname as[name],Plocation as[location ]  
FROM project  
where Dnum in (10,20) and City in ('Cairo','Alex')
```

8. Display the **Projects name, locations of the projects with a project name starts with "p" letter.**

```
SELECT Pname as[Projects name],Plocation as[locations ]  
FROM project  
where Pname like 'p*'
```

Data Definition Language:

Create the **dependent** table and create the relationship with **employee** table
Then Insert 3 rows only

```
Create table Dependent (  
ESSN INT NOT NULL ,  
Dependent_name text NOT NULL,  
Gender text NOT NULL,  
Bdate text,
```

```
PRIMARY KEY (essn,Dependent_name ),  
CONSTRAINT FK_PersonOrder FOREIGN KEY (essn)  
    REFERENCES employee(ssn)  
  
);  
INSERT INTO dependent (ESSN,Dependent_name,Gender,Bdate)  
VALUES (123456, 'Hala Saied Ali', 'F','18/10/1970');  
  
INSERT INTO dependent (ESSN,Dependent_name,Gender,Bdate)  
VALUES (321654, 'Omar Amr Omran', 'M','30/3/1993');  
  
INSERT INTO dependent (ESSN,Dependent_name,Gender,Bdate)  
VALUES (321654, ' Ramy Amr Omran', 'M','26/1/1990');
```

Data Manipulating Language:

1. Insert new employee with **your personal data**, you will be in **department number 30**, your **SSN = 666666** & **Superssn = 112233**.

```
INSERT INTO employee (Fname,Lname, Dno,SSN,Superssn)
VALUES ('my name','mostafa', 30,666666,112233)
```

2. Insert another employee with **personal data your friend** as new employee in **department number 30** , **SSN = 555555**, but **don't enter any value for salary or manager number to him**.

```
INSERT INTO employee (Fname, Lname, Dno,SSN)
VALUES ('my friend','ali',30 ,555555)
```

3. In the **department** table insert new department called **"DEPT IT"** , with **id 100**, **MgrSSN = 112233** as a manager for this department. The **start date for this manager is '08/12/2006'**

```
INSERT INTO departments (Dname,Dnum,MGRSSN,[MGRStart Date])
VALUES ('DEPT IT' ,100,112233 , '08/12/2006')
```

4. Do what is required if you know that : **Mrs.Noha Mohamed moved to be the manager of the new department (id = 100)**, and they give her position to your friend

Steps:

- a. Your friend will be the manager of **Dept 20** (her previous department)
- b. Update her record in your database to be a manager of **department 100**
- c. **Update your friend data, add yourself as a supervisor for him (supervised by you)**

```
UPDATE employee
SET Dno = 20
WHERE ssn = 555555;
```

```
UPDATE employee
set dno =100
where SSN =968574;
```

```
UPDATE employee
set Superssn =666666
where ssn =968574;
```

```
UPDATE employee
set Superssn =666666
where ssn =555555;
```

5. Unfortunately the company ended the contract with **Mr.Kamel Mohamed** so **try to delete his data from your database**, in case you need, you can be temporary in his position.

Upgrade your salary by **20 present** of its last value.

```
UPDATE departments  
SET MGRSSN =666666  
WHERE Dnum=10;
```

```
UPDATE employee  
SET Dno =10  
WHERE SSN=666666;
```

```
UPDATE works_for  
SET ESSN =666666  
WHERE ESSn=223344;
```

```
update employee  
set Superssn=666666  
WHERE ssn in (123456 ,112233);
```

```
DELETE FROM employee  
WHERE ssn=223344;
```

```
UPDATE employee  
SET Salary =1800*1.2  
WHERE SSN=666666;
```
